## EDUCATIONAL QUALIFICATIONS

Year	Degree	Institution(Board)	CGPA/%
July'17 – June'21 (expected)	B.Tech, ME & Minor in IME	Indian Institute of Technology, Kanpur	9.2/10.0
2017	ISC – XII	City Montessori School, Lucknow (CISCE)	95.5%
2015	ICSE – X	St. Francis' College, Lucknow (CISCE)	95%

## HONORS AND ACHIEVEMENTS

- 2nd in 15+ teams, Student AUV Competition (SAVe), organised by **NIOT, Chennai** in 2019
- Top 0.7%, JEE Advanced (amongst 160,000 candidates)
- Top 0.001%, JEE Main (amongst 1.3 million candidates)
- Top 1%, National Standard Examination in **Physics**
- Top 1%, National Standard Examination in **Chemistry**

## PROJECTS

**Team AUV-IITK** *Software Team Member*  
*Faculty Advisor: Prof. Mangal Kothari* May 2018 - Present

- Designed a **hierarichal finite state machine** for robust autonomous behavior of the vehicle with failsafes
- Fused sensor readings from Doppler Velocity Log (DVL) and IMU using an **EKF** to estimate odometry
- Developed and tested acoustic localization system capable of estimating the Direction of Arrival of ultrasonic underwater signals from pinger, using **STFT** and **Cross-Correlation**
- Tuned and tested Cascaded PID Controller on the vehicle, enabling it to perform waypoint navigation & visual servoing
- Extensively used **Gazebo**, a **physics engine** to simulate vehicle model in a hydrodynamically realistic environment

**Realtime Onboard Dense RGB-D Mapping on UAVs**  
*Mentor: Prof. Mangal Kothari* May 2019 - Present

- Studied and experimented various techniques related to 3D mapping of environment using monocular and stereo cameras on Jetson TX2 for onboard implementation
- Evaluated approaches for shortcomings and processing requirements while focussing on the scarce size, computation and energy resources on Unmanned Aerial Vehicles (UAVs)

**Mechanical Quadraped** *Course Project - TA202*  
*Mentor: Prof. Shantanu Bhattacharya* 4th Semester

- Designed and simulated a four-legged assembly that uses Jansen's linkage mechanism to walk using **Solidworks**
- Made a working model of the same under constraints of size and materials using manufacturing processes such as lathing, milling and drilling

**Chat-IITK** *Advanced Track Project - ESC101*  
*Mentor: Prof. Puroshottam Kar* 2nd Semester

- Designed and developed a chat application on NodeJS, Express, and MongoDB, selected in **12** out of 400+ students
- Implemented real-time chat using Socket-IO with PassportJS for extensively implemented **authentication** and **cookie handling** for session management
- **Database management** implemented using MongoDB, and application deployed online on Heroku's server

## RELEVANT COURSEWORK

Engineering Design and Graphics (A*)	Dynamics (A)	Fluid Mechanics (A)	Probability & Statistics
Fundamentals of Computing (A*)	Mechanics Of Solids (A)	Thermodynamics (A)	Complex Analysis
Theory of Mechanisms and Machines ( <i>i</i> )	Multi-Variable Calculus	Introduction to Robotics ( <i>i</i> )	Energy Systems ( <i>i</i> )

A\*: Grade for exceptional performance, *i*: In progress, A: grade

## WORK EXPERIENCE

**Intelligent Systems Lab** *Robotics Intern*  
*Supervisor: Mr. Ravi Prakash, Doctoral Student* April 2019 - Present

- Ported outdated available ROS code to operate on current development platform using ROS Kinetic on Ubuntu 14.04
- Actualized setup for simulation using **Rviz** and **Gazebo** for Universal Robots manipulator on a Guardian Robot
- Tweaked the hardware drivers and changed odometry publishers to fix position drift estimated by motor encoders
- Assisted in final aim to create collaborative autonomous robots capable of building walls, extinguishing fires

**New York Office, IIT Kanpur** *Backend Software Intern*  
*Supervisor: Prof. Manindra Agrawal* May 2018 - July 2018

- Worked on **Scala with Akka-HTTP** for scalable and concurrent multi threading using functional programming
- Documented and compiled the entire collection of backend Application Programming Interfaces using **PostMan**
- Fixed bugs in the Scala backend, and collaborated using Phabricator, while developing an upcoming social platform

## POSITIONS OF RESPONSIBILITY

**Team AUV-IITK** *Science and Technology Council*  
*Software Team Lead* April 2019 - Present

- Spearheading a group of 8 people working on the software of Anahita, planning and implementing technical changes
- Maintaining software stack of Autonomous Vehicle, deployed on Git, developed using ROS, OpenCV and Gazebo
- **Secretary, Robotics Club, IIT Kanpur 2018-19**
- **Secretary, Consulting Hobby Group, IIT Kanpur 2018-19**
- **Student Guide, Counselling Service, 2018-19**
- **Academic Mentor, Counselling Service, 2018-19**

## SKILLS

**Robotics:** ROS, OpenCV, Arduino, Gazebo, CUDA, Gym  
**Design:** Solidworks 2018, AutoCAD, Inventor, LabVIEW  
**Data Science:** Tensorflow, Keras, Scikit, MATLAB  
**Programming Languages:** C++, Python, Scala, Javascript

## MISCELLANEOUS

- **Runners Up** in robotic soccer event *Wild Soccer*, and *Visualise*, in inter-hall competition
- Developed an application which generated summaries of the latest news based on the current trending hashtags on Twitter as **code.fun.do** submission
- Developed basic platform game on game development framework **Unity** using JavaScript & C#, updated on Github
